Our aims & methodologies

The next generation of industry workers should be tech savvy, but VET programs and teaching methodologies have not caught up yet. The 1Point project aims to close this gap, creating an **innovative training methodology for the VET sector** through the adoption of a standard quality assurance method and information security process used in the industrial field.

The focus of the project is on the training of future maintenance professionals, in order to improve their IT skills, foster employability and develop innovative thinking.

1Point project will develop, transform, test, evaluate, improve and disseminate an innovative training framework comprising a new methodology along with an online training course.

#1PointProject

Our main objectives

The partners' purpose is to identify, for each involved country, the current needs and key competences for maintenance professionals.

Further, they will develop training content and contribute to an innovative curriculum aligned with the needs of industries, especially those characterized by high technological intensity.

Additionally, they will develop the 1Point methodology, including a **virtual Learning Motivation Environment**, a skills and achievements framework and trainer guidelines.

Our targets

VET trainers teaching maintenance subjects

Other VET providers, business support organisations, maintenance communities and companies

Maintenance professionals and trainees

A European partnership
